

PRODUCT NAME:

125MM SEGMENT DIAMOND BLADES CUTTING CONCRETE

PRODUCT CODE/S:

TUF125

OVERVIEW

THE 125MM SEGMENT DIAMOND BLADE IS ENGINEERED FOR HIGH-PERFORMANCE CUTTING THROUGH CONCRETE, MASONRY, AND OTHER HARD BUILDING MATERIALS. WITH ITS SEGMENTED RIM, IT OFFERS SUPERIOR COOLING DURING DRY CUTTING, REDUCING BLADE WEAR AND INCREASING LONGEVITY. DESIGNED FOR USE WITH ANGLE GRINDERS AND COMPATIBLE POWER TOOLS, THIS BLADE ENSURES CLEAN AND PRECISE CUTS EVEN UNDER DEMANDING CONDITIONS.

DETAILS:

Key Features:

- **Segmented rim design for faster cutting and better heat dissipation**
- Laser-welded segments for extended blade life**
- Suitable for both wet and dry cutting**
- High-quality diamond concentration for professional results**
- Low vibration and smooth operation**

Technical Specifications:

- Blade Diameter: 125mm**
Segment Type: Segmented
Bore Size: 22.23mm (universal fit for most angle grinders)
Application: Concrete, brick, masonry
Cutting Type: Dry & Wet
Max RPM: 12,200

Ideal For:

- Construction professionals**
Builders and contractors
DIY users cutting concrete slabs, bricks, and paving stones
General renovation and landscaping work
