Function

Drop forged

SELLING POINTS

1. The hammer handle is made of soft, non-slip rubber and TPR material coating, providing excellent comfort and strong grip, while the fiberglass structure absorbs vibration and reduces fatigue. 2. The sturdy straight claw design can pull out nails more effortlessly, and the claw tips of different lengths are easier to tear or puncture holes. 3. The hammer head and handle are bonded with high-quality epoxy resin glue, which is more solid, not easy to fall off, and safe
